Summary

Senior software engineer with 10+ years of experience building and scaling backend-heavy systems in energy tech, fintech, and banking. Comfortable across cloud architecture, API design, distributed systems, and secure integrations, with frontend work when needed. Experienced in cross-team coordination across multiple applications, client-facing consulting, and delivery-focused decision-making. Also quick to learn new stacks, modernize legacy systems, and apply AI tools to improve delivery speed and quality.

Experience

Senior Software Engineer at Berlin Bytes

11/2024 - Present

Digital agency

Energy/Climate Tech client

- Scoped and implemented support for the new German grid regulation (§14a EnWG) in the client solution, working across multiple product and engineering teams to roll out the new flows in production.
- Built a data-quality analytics dashboard to track and clean up duplicate or inconsistent installation records, giving ops teams a clear view of issues and their impact.
- Contributed to MVP launch for a new Nordic market, adapting existing customer journeys to local regulatory and utility requirements.

Software Engineer at Taxfix

02/2019 - 08/2024

Digital platform that simplifies tax filing for individuals by offering an intuitive, mobile-friendly solution to quickly and accurately complete and submit tax returns

- Designed and rolled out a new task assignment system, cutting average tax-declaration handling time by around 10% (about 4 minutes per case).
- Played a key role in delivering the MVP of the Italian product, from early prototype through to production launch.
- Reverse-engineered the official Italian tax declaration tool to align product behaviour with regulatory and technical requirements.
- Trained and mentored new hires, facilitating a smooth onboarding process and fostering a collaborative team environment

Software Engineer at iConsultants

03/2016 - 02/2019

IT consulting company

Crédit Agricole - leading French banking group: VoIP app routing phone calls to bank employees in real time

- Owned end-to-end development, maintenance, and scaling of a Cisco JTAPI-based VoIP app handling 600k+ calls/day across 80k+ employees, keeping performance rock-solid under peak load.
- Handled manual rollouts to 600+ servers, nailing configs and minimizing downtime during every release cycle.
- Jumped into production fires with cross-functional teams to troubleshoot and fix real-time issues, minimizing customer impact.
- Cut incident response time and boosted reliability by building custom monitoring dashboards and smart alerting rules.

Software Engineer at Safeware

09/2007 - 02/2012

- Rewrote the complete guest management suite for the front-desk system from legacy Delphi to modern C#/.NET, unlocking maintainability, scalability, and new feature development.

Education

Master's degree in Software Engineering (Diplôme d'Ingénieur)

09/2008 - 08/2010

Université Paris-Est Marne-la-Vallée, FR

Certifications

Google Cloud Certified Professional Cloud Architect

09/2025

Google Cloud

DAEFLE - Diploma in Teaching French as a Foreign Language

12/2019

Alliance Française, CNED
